

Chameleon Class Specifications

Production Data:

Origin: United Federation of Planets

Class and Type: Chameleon Class
Survey ship

Year Launched: 2242

Hull Data:

Structure: 15

Size/Decks: 3/2

Length/Height/Beam: 32/10/10 Meters

Complement: 2

Operational Data:

Transporters: 1 Standard, 1
Emergency

Cargo Units: 40

Shuttlebay: NA

Shuttlecraft: NA

Tractor Beams: 1 FV, 1A

Separation System: None

Sensor System: Class 2 [+2/C]

Operations System: Class 3 [0]

Life Support: Class 3 [0]

Propulsion System:

Impulse Engines: type IV [.5c] [0]

Warp Drive: Type IV [Warp, 4/5/6]

Tactical Data:

Phaser Arrays: Type III [X2/B]

Penetration: 2/2/2/0/0 [A]

Deflector Shield: Class 2A [B]

Protection Threshold: 13/3

Miscellaneous Data:

Manoeuvre Modifiers: +1C, +3H, +2T

Traits: Hardened System
[Deflector Shield]

Atmospheric capable

History:

The Chameleon Class survey ship was designed for planetary survey missions. Starfleet's strategy tended to be to drop dozens of these vessels to scan every inch of the planet surface. The Chameleon was produced in such numbers that it was inevitable that they would find their way into the civilian market. Her one warp nacelle generates a stable enough warp field allowing for fast travel. Whilst the initial releases had no weaponry many smaller companies released after market garage kits allowing the ship to be armed with an array of phasers.
