

APPENDIX II

PROMOTION [REVISED]

This section expands (and in some cases modifies) the list of Promotions and Ranks presented in the LUG books. As stated in the Core Rulebooks, the costs are cumulative; a character who has spent 2 points on Promotion must spend 3 points to advance to the next rank. The Narrator may allow characters of certain ranks some Renown along with their promotion (in general, only for characters who hold Promotion at +5 or greater) in recognition of the position of authority they hold. For example, certain captains and admirals are probably well known among the fleet; likewise, an ambassador or professor holding an important diplomatic post or chair may be well known among diplomatic and academic circles. This Renown award does not count towards the Renown totals required to be given the Promotion. Players who desire that their character earn more Renown than allowed by the Narrator should by the Famous Incident Advantage. No beginning character may start with a promotion higher than +3.
