

Son'a LASER PISTOL

Settings: 2 (high thermal only)

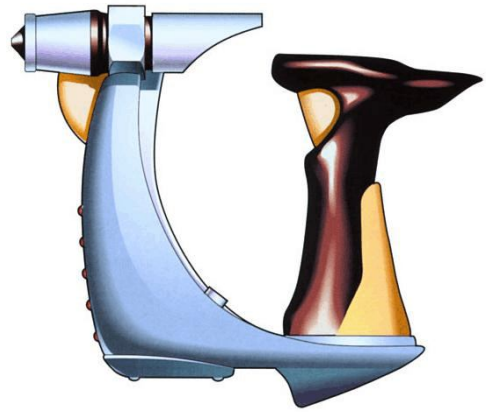

Range: 05/10/30/60

Size: 18.8 cm long

Mass: 0.56 kg

Energy: 60

Damage: 4d6+12 (4 charges)

Standard sidearm of the Son'a Command similar to old Earth laser weapons. An oddly designed weapon by most species standards.

Emitting an intense beam of light energy, a rather primitive and outdated weapon still favored due to it's painful wounds inflicted. Especially at close range.

It has seldom been available on the black market, and those pieces which do become available prove to be unpopular with the clientele. Thus, this weapon is rarely encountered unless in the possession of those in the Son'a Command.
